NOTE:

1. Transition from Observation to Observation by remaining on the Observation you are on regardless of the conductor's cue until you have figured out what the next Observation is, at which point you may arrive to it a little bit late -- this is OK as what is most important is that there is an incessant sound of talking throughout the Social Sound Game #10.
2. Watch the Conductor: the shift from Observation to Observation will be signified by a single arm wave

2. If pointed at keep asking the conductor out regardless of cue off
